

WISE 3.0

Date:7th october 2018

No. of participants:20

The women enrichment program WISE 3.0 initiated by the Malabar hub has been successfully completed by IEEE SB CETkr on 7th October 2018. Convinced and interested in the idea of digital literacy for needed, nearly 20 women from nearby areas and members from various Self Help Groups came up to the college for attending the event. Initially a brief description on the session was given to the volunteers for their involvement .The session started by giving a basic idea on computer by our volunteers, later on the session was used to teach the participants according to their need. Online shopping, money transfer, bill payment were taught with the help of about 30 volunteers from various departments of College of engineering Trikaripur. The session lasted for 3 hours. The program started from 10.00 AM and ended up at 1.00 PM. Each and every participant who attended the event was unique and their needs were entirely independent. Hence a

participant was allotted a volunteer each. Certain participants had a good base in computers and smart phones, where some were beginners. From access to social medias, online shopping, to e-portals, all the necessities were taught to an extent. We had a great feedback and their wish for attending such events further in future were also expressed.--
